

A CLOSE-UP OF EFFICIENT SEWAGE SLUDGE TRANSFER

Invitation to live demonstration of Smart Air Injection at the Hetlingen sewage treatment plant

You are cordially invited to join us for a visit to the Hetlingen sewage treatment plant. Come and witness firsthand the remarkable benefits of our energy-efficient Smart Air Injection, which conveys dewatered sludge over long distances of up to 1,000 meters.

Discover how the Hetlingen wastewater treatment plant leveraged our efficient conveying solution to drastically reduce its operating costs. Along with a comprehensive overview of application areas, options and features, you will gain valuable insight into potential savings through real-life case studies and practical references. During the plant tour, you will experience our pump system in action and up-close, providing a unique insight into the pump, the control room and the pumping process into the silo.

We look forward to hosting you on **April 24** and showcasing the remarkable benefits of Smart Air Injection. To secure your spot, register by **March 22, 2024**.

REGISTER NOW

When registering, please provide your first and last name as well as your company. If you will be arriving the evening before, let us know if you would like to come to a get-together (location to be announced).
